PROFILE SUMMARY

A motivated software engineer proficient in Java, Python, and JavaScript with a solid understanding of algorithms, data structures, and web development. Experienced in collaborative environments with strong problem-solving skills. Committed to continuous learning and contributing to innovative projects. Eager to apply technical knowledge in real-world applications.

PROJECTS

Personal Portfolio Website | *Next.js, Tailwind CSS, Git*

- Developed a personal portfolio website using Next.js.
- Incorporated dynamic content, responsive design, and modern animations to showcase projects, skills, and experiences effectively.

Corporate Website for Software Company | *React.js, Bootstrap, Responsive CSS*

- Developed a corporate website for a software company using React.js.
- Created and implemented interactive user interface elements that enhanced overall customer satisfaction ratings by 25%. Integration with backend services reduced average page load time by 50%, improving user retention.

CRM System (MERN Stack) | *MongoDB, Express.js, React.js, Node.js*

- Implemented user authentication (login, register, logout).
- Developed customer management system (add, view, update customers).
- Integrated task management for assigning and tracking tasks.
- Automated email notifications for special occasions.
- Designed a responsive and user-friendly interface.

Job Board Platform | *React.js, Node.js, MongoDB*

- Developed responsive pages for job listings, job details, and user dashboards.
- Implemented secure user authentication and profile management.
- Integrated job application with resume upload and email notifications.
- Added search functionality and optimized for mobile responsiveness.
- Deployed using free hosting platforms and version-controlled with GitLab.
